

BNY Mellon Pension Asset / Liability Summary

March 2008

Market Summary

- US stocks declined for the fifth straight month on fears that the financial crisis will affect the real economy
- Treasury yields were marginally lower as flight to quality continues
- Corporate bond yields widened more than 30 bp, the sixth consecutive negative month
- Market expectations of Fed easing moderated; consensus is 1.75% by Fourth Quarter
- Asset returns of moderate risk pension portfolios were off -0.3%; typical pension liability values were -0.5% lower
- Funding ratios for typical pension plans were up slightly

Asset and Liability Returns (%)

	This Month	Year To Date	One Year
Liability Returns: BNY Mellon "Typical" Liability Index			
Reporting Basis (1)	-0.5	-1.2	-1.0
Market Value Basis (2)	+1.6	+3.6	+13.2

Asset Returns (%)			
Russell 3000	-0.6	-9.5	-6.1
MSCI-EAFE®	-1.1	-8.9	-2.7
LB Aggregate	+0.3	+2.2	+7.7
LB Long Credit Aa	-0.3	+0.2	+2.3
LB Long Treasury	+0.9	+4.0	+13.0

Benchmark Portfolio (%)			
Moderate Risk (3)	-0.3	-4.8	-0.2

Benchmark Portfolio Return vs. Liabilities (%) (BNY Mellon "Typical" Pension Liability Index, Reporting Basis)			
Moderate Risk (3)	+0.2	-3.6	+0.8

The graphs show the cumulative return of a moderate risk portfolio (see Notes below) compared to the return of BNY Mellon's "Typical" Pension Liability Index, using Reported Value discounting. The Funding Ratio is the ratio of market value of assets to reported value of liabilities, and is assumed to begin the period at 100% funded.

Notes

- (1) Reported Value of Liabilities: projected payments discounted at Aa Corporate term structure
 - (2) Market Value of Liabilities: projected payments discounted at US Treasury term structure
 - (3) Moderate Risk Portfolio: 50% Russell 3000, 10% MSCI EAFE, 40% Lehman Aggregate Bonds
- See attached disclosures

- (5) Aggressive Portfolio : 65% Russell 3000, 15% MSCI EAFE, 20% LB Aggregate Bonds
- (6) Long Duration Bonds : 100% LB Long Credit Aa Bonds

Disclosures

This does not constitute investment advice. You should keep in mind that no allocation plan can always ensure a profit or protect against a loss.

Liability Index Disclosure:

The BNY Mellon Pension Liability Indexes are calculated using the present values of hypothetical *Retired*, *Mature*, *Typical*, and *Young* benefit liability cash flow schedules, as calculated by BNY Mellon research. These cash flows are discounted according to a proprietary term structure model applied to every forward payment date. Pricing for the term structure model is developed from BNY Mellon internal research. Returns for each of the BNY Mellon Pension Liability Indexes are calculated from monthly changes in the present values of each index.

Index valuations and return calculations are performed using two sets of data. The *Reporting Basis* discounting uses high-grade corporate bond yields to fit a proprietary BNY Mellon term structure model. This method is intended to provide a reasonable approximation of the methodologies generally used for accounting and funding purposes. The *Market Value Basis* discounting uses US Treasury bond yields to fit a proprietary BNY Mellon term structure model. This method is intended to provide a reasonable approximation of the cost to purchase annuities for the liabilities.

Asset Returns Disclosure:

Returns for each of the hypothetical portfolios described in the text are calculated as the unmanaged weighted average of the applicable indexes, with monthly reset to the target asset mix.

Index Disclosure:

The Russell 3000 Index is an unmanaged capitalization-weighted index that is broadly representative of U.S. equity markets.

The MSCI Europe, Australasia, Far East (EAFE) Index is an unmanaged market-value-weighted index of more than 1,000 securities issued by foreign companies.

The Lehman Brothers U.S. Aggregate Index is an unmanaged index broadly representative of the taxable U.S. bond market.

The Lehman Brothers U.S. Long Credit Aa Index is an unmanaged index representing public obligations of U.S. corporate and specified foreign debentures and secured notes with a remaining maturity of 10 years or more.

The Lehman Brothers U.S. Long Treasury Index is an unmanaged index representing public obligations of the U.S. Treasury with a remaining maturity of 10 years or more.

The Lehman Brothers 25 Year Zero Coupon Bellwether Swap Index is an unmanaged index representing the return of a zero coupon swap of 25 years maturity.
